Franze Kenneth Lobos

Software Developer — Web and Mobile(Flutter)

Cebu City, Philippines | franzelobos1@gmail.com |codebyfranze.netlify.app | (+63) 962-752-9428

Summary

Software Developer with 4+ years of experience in web development, backend engineering, and building scalable applications. Skilled in system architecture, problem-solving, performance optimization, and Agile methodologies. Experienced in delivering secure, efficient, and maintainable software solutions while continuously improving development practices and exploring emerging technologies.

Professional Experience

Freelance Web Developer

June 2023 - Present

Freelance | Remote

- Conducted regular research and analysis of **client requirements and industry trends** to better understand project needs and consistently deliver high-quality solutions.
- Maintained **proactive communication with clients** by providing regular work progress updates through email and messaging channels.
- Initiated **client presentations and progress demonstrations** to gather feedback, validate requirements, and address issues or adjustments early in the development process.
- Adapted **Kanban and Agile methodologies** based on the client's preferred workflow, project requirements, and availability to ensure efficient and flexible delivery.
- Managed a maximum of **two clients simultaneously** to maintain focus, ensure quality output, and effectively balance time and project commitments.
- Web Development: Utilized the FERN stack to build scalable, responsive, and maintainable web applications tailored to the needs of startup businesses, with a focus on quality, performance, and modern architecture.
- UI/UX Design: Utilized Figma, Adobe XD, and Adobe Illustrator to create modern, intuitive user interfaces and high-quality visual assets that align with startup branding and business objectives.

Junior Web developer

August 2022 - February 2023

Mai Baun Tour Incorporated | Cebu City | On-site

- Researched emerging web technologies and tech stacks, developing and presenting proof-of-concept implementations and findings to senior developers.
- Built and maintained responsive, scalable, and high-performance web applications using the **modern FERN stack**, focusing on clean architecture, performance optimization, and maintainable code.
- Integrated **Firebase services**, including Push Notifications, Firestore, and Firebase Storage, to support real-time data management, cloud storage, user engagement, and reliable application functionality.
- Actively participated in **Agile/Scrum ceremonies**, collaborating across teams to identify successes, address challenges, and resolve blockers to improve delivery.
- Conducted **peer code reviews** with fellow developers to improve code quality, maintain visibility, and promote awareness of ongoing features and implementations.
- Participated in **weekly demos with the Development Lead** for mentoring, technical feedback, knowledge sharing, and continuous improvement.

Associate Software Engineer October 2021 - February 2022

NTT Phils. Digital Business Solution Inc | Makati City | Remote

- Utilized **Java and object-oriented design principles** within the **Java EE framework** to develop and maintain scalable backend services.
- Contributed to the **R&D team** by researching, evaluating, and prototyping emerging technologies and presenting proof-of-concepts to mid- and senior-level developers.
- Actively participated in **Agile/Scrum ceremonies**, clarifying requirements and raising questions on ambiguous or unclear tasks to ensure proper implementation.
- Applied the **MVC architectural pattern** to build structured, maintainable, and robust backend applications.

Technical Skills

AI-Assisted Development: Claude

Cross-Platform (Flutter): Flutter & Dart,JSON Parsing & Data Serialization, Async Programming & Futures

Firebase Technology: Firestore, Storage, Pushnotifications , Messaging

Web Development: React.js, HTML, CSS, Node.js, PHP, routing, body-parser, Docker

Version Control: GitHub, GitLab, Bitbucket

Education

Bachelor of Science in Information Technology

University of the Visayas

Graduated: February 2021
